

INTRODUCING THE PLATFORM

Welcome to the Pediatric Complex Care Platform

Children with medical complexity deserve care that is coordinated, compassionate, and built around the whole child and family.

Pediatric Complex Care is dedicated to children with complex chronic conditions who often require multiple specialists, significant healthcare support, and medical technology. Their care extends beyond individual diagnoses — it requires integration, coordination, and a team that sees the bigger picture.

The Pediatric Complex Care Platform was created to help healthcare professionals deliver that care.

What you will find

Practical, evidence-informed resources designed specifically for Pediatric Complex Care:

Clinical guidelines

Protocols

Checklists

Family
educational
resources

Educational
presentations

Key literature

Ready-to-use
tools

And more

Our mission

Through this platform, we aim to:

01

Advance

Advance the quality of care provided to children with medical complexity.

02

Translate

Translate evidence into practical tools that healthcare professionals can use at the bedside, in clinic, and at home.

03

Educate & inspire

Educate and inspire the next generation of Pediatric Complex Care professionals.

04

Share

Create an open platform for sharing knowledge and expertise in Pediatric Complex Care.

Together, for every child and every family.
