

Welcome to [PEDIATRIC COMPLEX CARE PLATFORM](#)!

Pediatric Complex Care is a field of expertise that serves the most fragile and vulnerable children. It serves children with medical complexity.

Those are the children with complex chronic health conditions, receiving care from multiple services, with significant functional limitations and high care demands and who may be dependent on medical technology to survive.

In this website, you can find a wide range of resources about the core areas of expertise in Pediatric Complex Care, including:

1. Clinical guides
2. Protocols
3. Checklists
4. Guideline summaries
5. Presentations
6. Important articles
7. And much more!

Through this website, we aim at:

1. Enhancing the care delivered to children with medical complexity (CMC)
2. Educate learners, including pediatric residents, Pediatric Complex Care fellows and anyone who may be managing CMC, about the core topics in the field of Pediatric Complex Care
3. Provide a platform and a free space to share expertise in Pediatric Complex Care
